- Crew rosters
- Agent management
- Audits

Maintenance

- Flight logs
- Trend data capture
- Track Components, Inspections, ADs, SBs
- Defects
- Inventory
- Purchase orders
- Work packs
- Jobs

- Typical reasons for using [TakeFlite](#) include:
 - Enabling a new route or service
 - Information visibility across group
 - Catering for loss of key staff
 - Meeting CASA/CAA requirements
 - Access to new sales channels
 - Merging airlines
- A booking system is a start, but Takeflite is also the answer to what to do with sales information once it's collected i.e. crew rosters, rescheduling and managing outages, maintenance, reporting & forecasting
- Bring your organization together by eliminating silos of information (i.e. spreadsheets, Access databases, paper)
- For airlines with lots of aircraft, offices and complex products to sell, Takeflite is a proven long term cost effective service
- Tried a computerizing project before and believe it's too hard? 30 different & complex airlines so far have successfully automated using Takeflite
- One solution for any combination of scheduled, charter and scenic services
- With millions of dollars in turnover and tight budgets, it makes sense to invest a little to work out where it's all going
- Takeflite costs about the same for a year as a team of consultants for a week, but with Takeflite you can try changes and measure outcomes yourself
